They offer a variety of insurance products to all segments of the population, including large employer groups, small business and individuals.

Industry: Healthcare

Location: IL

Engagement Details

Service Type: Web Application Design, Development, Upgrades, Integration and Maintenance Support

Engagement Mode: Offshore

Resources Deployed: Onsite: 3

Duration: Ongoing

Key Benefits

- Web based administration – thus no client installations are required
- Customizable options for creating a variety of surveys with multiple types of questions and data types available within the application
- While creating a survey, admin can use the pre-existing pool of questions or can also copy the entire survey based on the similarity.
- As our proprietary product was easily Scalable & Customizable to the client's specific need, we could able to deliver the actual application expeditiously.

Customer Challenge

Our client was looking for a vendor who can help them in developing a web based survey application with a set of pre-requisite features and functionalities. Due to the shortfall of time, their preference was to work with the vendor, who has a similar proprietary scalable & customizable survey product.

Web based Survey Application

We have customized our web-based application which is a Comprehensive Survey and Reporting Tool that can handle any level of complexity for creating, assigning & analyzing reports with a multiple set of available Question Types using a variety of Data Fields, as per our client need. We have integrated this application with their SharePoint Portal, with a single sign-on (SSO) technology. It supports all major databases like - Oracle, MySQL, MS SQL Server, Db2, PostgreSQL etc.,

Technical Environment:

.NET MVC 3, Net MVC 3, MS SQL Server 2008 R2, Telerik Controls for Reporting, SharePoint,
